Mini Cyber and Data Conference

13:30 - 17:00 | 20/03/2024 | St Paul's Centre, Dumaresq Street, St Helier JE2 3RL

Book now →

Join the Jersey Cyber Security Centre (JCSC) and Jersey Office of the Information Commissioner (JOIC) for a half-day conference on the relationship between cybersecurity and data protection.

Book here

Cybersecurity and data protection are closely linked. A core function of cybersecurity measures is to protect personal data from unauthorised access: when cyberattacks are successful, they often involve the compromise of personal data.

Similarly, a fundamental principle of data protection principle is to use the appropriate technical and organisational measures to ensure the integrity and confidentiality of personal data.

This half day conference is aimed at everyone working in the related fields of data protection and cyber security.

Attendees will have the chance to discuss how cyber security and data protection interact, including how they are – or should be – regulated.

They'll also have the opportunity to ask questions of both the Information Commissioner for Jersey (Paul Vane), and the Director of the Jersey Cyber Security Centre (Matt Palmer).

This event also includes a drinks reception sponsored by the Islands Data Governance Forum (IDGF) so that attendees can meet colleagues who also work in this area.

This event is free to attend and open to everyone, but will be of particular interest to Islanders working in the cybersecurity and data protection fields.

Refreshments will be provided.

Agenda

13:30 - 13:45 - Arrivals

13:45 - 14:00 - Welcome and introductions

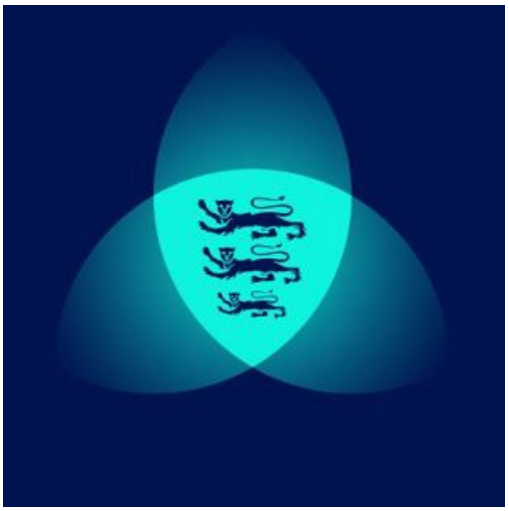

14:00 - 14:30 - Q&A session with Matt Palmer and Paul Vane
