Book here →

Join the Jersey Office of the Data Commissioner for this Let's Go DPO session which will focus on navigating data breaches.

Book here

Personal data breaches can have devastating impacts for individuals. This session will explore common pitfalls that lead to personal data breaches and provide steps to help you avoid them. It will also let you know when personal data breaches should be reported to our office and help you to ensure you have robust breach detection, investigation and internal procedures in place in the event of a breach.

Let's Go DPO is a support network from the JOIC giving Data Protection Officers and those that have responsibility for data protection the chance to network, identify and explore common experiences and engage with our office in a safe and

confidential environment.

The network’s purpose is to promote compliance and awareness of the Data Protection (Jersey) Law 2018 and demonstrate our office’s commitment to providing support to local Data Protection Officers and those that have responsibility for data protection by offering the opportunity for discussion and to contribute to our office's development of initiatives and other guidance, where appropriate.

All are welcome at this session, which is free of charge.
