Jersey Business Reopens Productivity Grant for 2025

17th September 2025

Press Release 17th September 2025

Jersey Business is delighted to announce the reopening of the Productivity element of the Better Business Grant for 2025. The grant, which was closed in July after reaching its full allocation, is now once again accepting new applications now that all applications have been reviewed.

Since the initial closure, a number of applications were found to be ineligible or unsuccessful, meaning there is now funding available for eligible businesses and projects. We encourage all businesses in Jersey to consider applying for this valuable opportunity to invest in their productivity and growth, with government support of up to £75,000 available per successful applicant.

How to Apply:
Businesses interested in applying for the Productivity Grant should visit the Better Business Grant application page, where full eligibility criteria and application guidance are available. The application process involves:

- Completing an online application form outlining your business and proposed productivity project.
- Providing supporting documentation, including evidence of business registration in Jersey, employment employee status, and up-to-date tax compliance.
- Detailing the expected impact of the project on your business's productivity and growth.

Applications are assessed on a first come first served basis, and funding is limited. We would encourage applications as soon as possible to avoid missing out.

Jennie Smith, Head of Business Support at Jersey Business, said:

"We have seen a great range of productivity projects through the grant application process this year, many with the potential to be game changing for local businesses. It is for this reason that I am delighted we can reopen the Productivity Grants today – so that more businesses can benefit. This is a fantastic opportunity for local businesses to access significant government support and drive productivity improvements."
