

Heat Pump Masterclass

9:00am - 13:00pm | 28/11/2025 | Radisson Blu
Waterfront Hotel, Jersey

Book now →

Heat Pump Masterclass at the Radisson, designed to support Jersey's industry professionals in the transition to low carbon heating.

Join the Government of Jersey and the Contractor Quality Scheme (CQS) for a free half-day Heat Pump Masterclass, designed to enhance the skills and knowledge of Jersey's heating and plumbing professionals. This is a unique opportunity to gain **technical insight**, explore **heat pump technology**, and engage in **open discussion** with peers and experts.

What to Expect:

- **Four 30-minute seminars**, each focused on heat pump installation best practices and technical know-how.
- Hear from **Mitsubishi Electric, Samsung, Vaillant and more industry experts** as they share insights and expert guidance

for efficient heat pump installations on island.

- Learn about **the importance of CQS accreditation** for you and your clients.
- Gain insight into **the direction of Government policies**.
- **Opportunities for networking** with industry peers and world-leading manufacturers.
- Enjoy **complimentary food and refreshments** throughout the event.

Why Attend?

- **Upskill your workforce** with practical knowledge and gain exclusive access to localised technical guidance.
- **Shape the future of heating in Jersey** by contributing to open discussions and learning from industry leaders.
- **Engage directly with the Government of Jersey and CQS** to access the support you need to navigate the low carbon heating transition.

Who Should Attend

This event is tailored for professionals and businesses involved in the design of low carbon heating systems and the installation of heat pumps. Whether you're a **heating engineer, installer, plumber, electrician, business owner, architect**, or part of a **construction firm**, this masterclass offers valuable insights for you.

Please note: This event is designed for individuals with existing knowledge of low carbon heating systems and heat pumps. The content may be most beneficial to those with prior experience or technical understanding in this area.

Full agenda and session outline to be provided closer to the time.

Tickets are free but limited, and available until Tuesday, 25th November 2025.
