The world of cyber security is moving fast, and the threats are ever-changing. But there are many free ways that you can protect your personal devices, and make it less likely that you'll fall victim to a scam or hack.

In this free event, our team will give you clear information on three ways that you can protect yourself online. We'll offer clear language, information you can act on, and share more advice.

No prior cyber security knowledge is needed.

Please note: you can attend this event in-person or online. Please select your preferred attendance method when booking your ticket.
