Artificial Intelligence is transforming the way we work, do business and deliver public services. But what does this mean for Jersey's future?

Book now

On Thursday 4 February 2027, Digital Jersey is bringing together leaders from business, government, regulation, education and technology for an evening of expert insights, thought-provoking discussions and live debate at the Royal Jersey Showground.

With AI presenting both opportunities and challenges, the evening will explore its potential impact on Jersey's economy, workforce, public services and future competitiveness, and the decisions needed to make the most of this rapidly evolving technology.

What to expect:

Join us for an engaging evening featuring keynote insights from leading AI experts, moderated panel discussions and interactive audience participation, giving you the opportunity to hear different perspectives and have your say.

The event will feature speakers including:

- Laura Gilbert – Former Head of AI for Government, Tony Blair Institute
- Dame Wendy Hall – Internationally recognised computer scientist and AI expert
- James Kuht – Founder and CEO, Pair
- Stephan Thoma – Organisational Strategic Advisor and Executive Coach, Former Google Global Learning Director
